THREE BRITISH WARSHIPS SUNK

Last night the Admiralty reported the loss of three British ships, the Aboukir, Cressy, and Hogue. They were attacked by five submarines. The Aboukir was the first attacked. The other two came to her assistance. Two of the attacking submarines were destroyed.

The three ships destroyed were built in 1900, and were on the reserve list, but were called out for patrol duty in the North Sea.

LAND FIGHTING

During the past week tremendous fighting has continued along the banks of the Aisne River, in France, and neither side has gained any decisive advantage, except that on their right wing the Germans have been forced back seven miles.

The Russians still continue to advance into Austria and German Poland, the demoralised Austrians being unable to hold them back.

LOCAL JOTTINGS

The U.F.A. held a successful annual sale on Saturday.

Not as many horses as were anticipated were sold to the Government at Gladstone on Wednesday. The price offered was considered too small for the class of animal brought forward.

Mr. W. L. Fairclough, superintendent of the Dominion Government's Experimental Farm at Lethbridge, arrived here yesterday, and will spend several days examining the crops in this district.

Mr. A. B. Cline, formerly editor here, has, we understand, gone home. He has joined the Scottish Lighthouse.

The University of Alberta has lent the programme of the Provincial High School Debating League. Strathmore should be represented next year.

Special Daily Day services will be held at the Presbyterian Church Sunday School on Sunday at 12 noon, also at the evening service.

Ladies stopping at the Maple Leaf will get all the courtesies possible shown them.

The Graham Bread of the Strathmore Bakery is the most wholesome and deliciously flavored bread Try it.

Calgary Board of Board are advising farmers to store all the hay they can, as the demand is likely to be large this winter. Cattle bodies are now taking a lively, if rather belated, interest in the farmer.

Mr. B. Hugg's father and brother left yesterday for their home in Pendleton, Oregon.

Front in the mortgage now.

The Union Bank of Canada, who opened a branch at Valerian Military Camp three weeks ago and who have been rendering assistance to men from the branch and any of their other offices without exchange have now moved into a permanent building located next to the staff quarters.

NOTICE TO FARMERS

Will every farmer co-operate with the Weed Inspector and insist that his seed and separator are swept clean of all weed seeds before threshers come on his place. All farmers must clean up or destroy all weed seeds within five days after threshing.

CHAS. FALKNER
Weed Inspector R.N. Bow Valley

Town Council

The regular meeting of Strathmore Town Council was held on Tuesday evening. Mayor Lambert presided, and Councillors present were Messrs Brown, Zerle, Girvin, and Foster.

FENCING OF THE PARK

It was stated that no work was being done yet on the park fence. Mr. Vickers said that the contractor had not started the work yet, though he knew that the work was wanted, and he took occasion to resign his appointment as Park Superintendent.

Mayor Lambert and other members spoke in high commendation of Mr. Vickers' work, and a motion was passed asking him to reconsider his resignation, expressing their confidence in him, and thanking him for the work he had done.

Mr. Vickers said he was willing to go on with the work, if he felt he had the support of the Council. He felt that the Council had hardly done the right thing when they had given the job of erecting the dressing room for the ladies to a contractor who had not finished his previous contract with them.

Councillor Brown moved, seconded by Councillor Girvin that the contractor be advised that all work contracted for by the Council was to be completed by October 1.

Mistaken Identity

A peculiar case of mistaken identity was heard here before Justice Lambert and Vickers on Monday, when Frank Girvan was charged at the instance of A. McLean with horsestealing.

Last week Mr. McLean, who is well known here, and has a sheep and horse ranch about eight miles north of town, was approached by a couple of men who represented that they were agents of the Government, and told McLean to bring his horses into the sale at Glenora on Tuesday and Wednesday. The horses, however, were not sold, and they were not returned to McLean, and all the information he could get was that they had been taken out of the stable by a man who had paid for the stable charges for them, and said he was taking them back home for the local police, and as a result investigations were made in Glenora, and Frank Girvan was charged with the theft. When he appeared, however, the mystery was cleared up and the charge was withdrawn.

The accused had actually taken them from the livery barn, but to the wrong McLean, there being another person of the same name residing near Glenora.

Girvan had nothing to do with the two men who had first induced Mr. McLean to send his horses to the sale, and he paid the livery bill and took the horses back because he was very friendly with the Glenora McLean, and knew he would be reimbursed for any trouble he had been put to.

The manager, chief, and all employees are white at the Maple Leaf Hotel.

No More Orders for Sales

The important announcement that no more orders for sales would be given for the specific performance of sale or foreclosure in mortgage actions was made by L. F. Cherry, master in chancery, last day morning.

The various judges of Alberta have expressed themselves as being opposed to giving judgments in foreclosure proceedings in connection with mortgages during the depression caused by the great world war being waged. The master in chancery says this understanding will continue until the war is over. It does not apply to anyone who has absconded from the province.

The announcement is of the utmost importance to thousands of farmers in Alberta, whose operations have been somewhat crippled by the depression caused by the war. It will be a relief to debtors all over the province.

Spend Your Money At Home

In times of stress like the present, while the war cloud hangs over Europe, and financial conditions all over the world are upset, it is the part of the patriot to localize his expenditures, and enable the people of his own town and district to keep their heads above water.

Throughout the Advertising Columns of this paper will be seen details of many bargains—actual bargains that can be seen, tasted, and handled. You know what you are getting before you pay your money. You don't pay the money first and get the goods several weeks afterwards, with doubtful satisfaction.

If your local dealer hasn't got just what you want, he will get it for you.

WORLD'S MOST-TRAVELLED MAN: he building t

[illegible][illegible]

The society has spread and, until today there are more than 100 groups in 25 countries in the world, with more than 400 members.

Christ-Devolver Endeavor exists in every country of the world, each week meetings are conducted in the local groups. The society's literature of the society is printed in as many tongues. It includes the following: a monthly periodicals *ear Christ-Devolver* news; more than 200 *Christ-Devolver* tracts; and the *Christian Endeavor*. There more than 750 different kinds of

in the millions of pages of spirited matter are being organized almost everywhere, beginning with the movement of the interdenominational in its scope work. Though it began in a Comstock, N. Y., church, the movement has spread to other denominations that take Christian Fellowship as their young people's society and to the churches of the more Methodist Christian. The movement has been spreading from these areas to other denominations, and many of the Methodist churches have a purely denominational character. The movement has been spreading from these areas to other denominations, and many of the Methodist churches have a purely denominational character.

There are many societies in the world, therefore, and the Christian Church is second in number of societies to the Mohammedan Church, at fourth in England. Burma, India, the Papists led in Christendom, and the Mohammedans in France and other countries. The United States is the largest of all nations. In Italy and Waldensia, the agency has done more to bring the Christian religion nearer to the people than has the State. The present tendency of the Christian religion is to divide, in a large part, to

Endeavor, with its moral and spiritual values, is the only force that can bring peace from local and county Christian Endeavor union gatherings; of one of the largest of these is the World's Conventions, with its peace and tens of thousands of people from all nations. The churches in this country are large; the largest county, all, seldom have more than 100 members. In the United States, its record is 100,000 members. Mrs. Max, 2, 1000 Madison Ave., New York, is president of the International and 10th World Convention to be held in Chicago, 1925.

Since this work is world-wide, in character the time came when it

live all his time to the service of his country from state to state, providing the people with the best of his knowledge. There were no funds available to him to carry out his work from which to employ a secretary or a driver. He gave up the pastorate of the Central Congregational Church, Boston, and through all these years he even himself to this work, without the aid of salary from the Unitarian Universalist Movement. Dr. Van Dusen earned his own living by the writing of books, and the special articles for magazines and newspapers. Not only has

[illegible]

Clark has been received by the state and county officials. A Peru, Argentine, Brazil, the of Norway, Sweden, Greece the and the state of New York. There is no American citizen, has been more greatly honored than he is in his country anywhere.

Clark is appreciation of the years of service for the cause, and he would want to be able to do it. They want to bring

"I fully considered, and it is to all that the wisest and substantial thing to do was to build a building which should be the national Christian Endeavor center. The plan calls for a five-story building, two stories of which shall be used for the offices of the movement, and the top two floors that is now paid in rents for purpose, and three stories of

Smallest of Cows

The Dexter is a breed of little cat—a full-grown cow is only three feet high and can thrive in a fair-sized back yard and give twenty quarts of rich milk a day.

The American herd book classification has been granted to the Dexters, which are declared by prominent livestock breeders in this country to possess a number of particularly valuable traits. The cattle, it is stated, will fatten and yield large quantities of milk on pastures where other cattle would starve to death. Furthermore, it is said, the Dexters possess extremely hardy constitutions and the vigor, and are absolutely immune to the various contagious diseases of the dairy.

It is believed, has been attained by the conditions under which it has been developed in its native country. It was introduced into Ireland originally by the poor peasants of County Kerry, the Dexters ran successfully at will over the hills, shepherding all seasons of the year, and the people began to foster for food the numerous outdoor life weeded out all diseases; only the very strongest survived and these transmitted their power to their offspring in increasing measure, until the Dexter of today is an animal that, according to the testimonies of those who know the breed well, can thrive in places where other breeds would thrive but poorly.

the worms that infest children from birth are of two kinds, those that lodge in the stomachs and those that are found in the intestines. The latter are the most destructive, as they cling to the walls of the stomachs and if not interfered with will have their way. Miller's Worm Powders destroy both kinds and while ex-
ing them from the system serve to
ir the damage they have caused.

Meeds of " - Bay of Fundy

The bay of Fundy is full of strange
coastal cities, features, Grand

island, with lies to the port of a vessel entering the bay, is rocky gray eyard—on the reef of southeast an imperd ship is a non sight. Every indentation, nay, rocky cranny, bears some ter- and suggestive of a shipwreck or some maritime tragedy, the third, twelve miles in length and sparsely inhabited, is a graveyard filled with the bodies of unknown sailors. A little above Trinity rock the Gulf of Nova Scotia rises in rocky, belts from the sea and a narrow admit to the Annandale narrows, strange to say, the eye reveals fertile valleys of apple orchards to raise the highest priced fruit

world. In this sheltered space climate which, owing partly to salt stream and partly to position, is altogether from the arctic cold to a stern sea wind;— *Westminster Gazette*.

Potato Juice Cure

Potato juice as a remedy for sprains, burns, goost, rheumatism and such is recommended by Dr. H. C. Howard of London in an article in the *London Lancet*. He cites numerous cases in his own practice in which the pain has been relieved by it, sometimes by a single application, and the fluid that has exuded from the joint or the membrane has

absorbed within a few days, at which time the juice is used as an ointment, or as a plaster. The raw pots are sponges. In a hydraulic press starch and nitrogenous matter are added and the juice boiled. The oil is made five times as strong as fresh. Glycerin is added to pre-
vent it.

Some Insurance Items.

Beyond the fact that we can insure our own lives—a fact of which actors, canvassers, and officers do all to remind us—few people realize that quite legal insurances can be taken out in many ways, London Assurance, for instance,

subject of the king has an infinite interest in the king's life. May insure him. A creditor can insure the life of a debtor for amount of the debt, and the creditor the debt is paid, the creditor awfully continue the insurance. Employer of labor can insure the life of his workers, the insurance which alone makes the policies being that he is liable for fatal be received in the course of their life. Here relationship does not insure the father, the father insures each other, and the father can insure his father; but a father cannot, generally speaking, insure his brothers and sisters. Life poli-

be sold or assigned, with notice to the company and an acknowledgment, but fire policies are not entered without the company's assent.

Ward's Liniment for sale everywhere.

Who Owned the Car?

Old law in California construes, required that every car passing over the turnpike toll should be plainly marked with the name of the owner so that the person of any lawlessness could be detected.

Young farmer known as Stam-

Jim was summoned before a state, who demanded why his did not appear on his two wheels. "Whose name am I to pay?" demanded the defendant. "My own, of course," said the magistrate, "but it isn't my car, you won't say that." "Who is the owner, then?" demanded the magistrate. "That's the trouble, sir," said "T-T," "old Shasta belongs to David T-T-Tomas, the wife of T-T-T belongs to Hugh J-J-Jones, and axle to W-W-William B-B-B-T-T-T belongs to Joshua T-T-T. I don't know who the car belongs to."

Then we whose job we are
not or, sir?" National Magazine.

An Angry Constituent
I'll never vote for that fellow
any more!"
I wrote him that I wanted a gov-
ernment plus a and he sent me a couple
of billings from the agricultural de-
partment."

Russians Passed Through England

SAYS LETTER RECEIVED HERE LATELY

A letter received by a local family from a lady relative residing in Yorkshire, a county on the East of England, among other interesting information, relates from personal observation what has been so often affirmed and denied, that a large number of Russian troops passed through England on their way to France or Belgium.

The letter was dated August 25th, and in regard to the Russians it states:

"This morning I was in the garden and we can see the country right from the railway to nearly Ship-ton from our house, and the Midland Railway runs right through the valley. What do you think we saw? On the railway came about 30 trains, one after the other, and they were filled with Russian soldiers. Instead of having to get to Germany by sea, which would take a very long time, they are coming here from Russia to Aberdeen, in Scotland, and to Newcastle and Leith, there down to London, then across to France by boat."

TWO TRAINLOADS GERMAN PRISONERS

"The last fortnight 100,000 men have enlisted for soldiers. The other day Mr. Ellison saw two train loads of German prisoners at Kightly bound by Lancaster Castle. They will be guarded there till the war is over."

GERMAN AIRSHIP SEEN

"On Friday a German airship went over our house, and we felt afraid for fear they should drop bombs down as they went over. We have service at church every day, both morning and evening, and the town hall has been turned into a large place for sewing, making shirts and all sorts of things to be sent for the soldiers."

All the Dukes have given their residences to be used as hospitals, and the King has given one or two castles for the purpose."

"Food is rather cheaper than it was a week ago. It was awfully dear then. The shopkeepers had risen the prices, but the Government brought all prices down."

Increase in Tax Rate

At a special meeting held on Thursday evening the Town Council struck the tax rate for the year. It shows a considerable increase over the rate for last year, the 1913 rate being 23, while the 1914 one is 24.

The estimates by the various committees of the cost of doing business for 1914, on which the Council based their tax rate, is as follows:

Licensing and Police—\$1000	
Fire and Light	800
Public Works	118.31
Finance	137.00
Schools	6300.00
	\$10545.31

The public works estimate was composed principally of the cost of constructing irrigation ditch into the park, fencing of the park, and two dressing rooms.

The rate of taxation was struck as follows:

General	20 mills
Special debenture	23 "
Firewall	\$1.80 per foot
Cement Sidewalk	60c per foot
Plank-sidewalk	40c per foot
It was agreed to give 5 per cent discount on all taxes paid on or before the October 15.	

Personal Christmas Cards

It may be a far cry from war and harvest to speak of Christmas but we wish to mention again that there has arrived at the Standard Office the best assortment of Christmas Greeting Cards which we have seen. The series are exceptionally fine and the designs are really unique. We have obtained these samples early so that intending purchasers may have plenty of time to look over the samples and the ladies will have plenty of time to inspect these samples and change their minds.

which is their prerogative, many times if they desire. We invite everybody to come in and see these samples, just to give you an idea of the splendid range of choice these offer. If preferred you can phone 17 or 68 and we will have one of our representatives call and leave sample book for your inspection at your residence or office.

We know that if the cards are once viewed an order will be given.

Thrashing in Progress

SOME CROP RESULTS

The weather of the past week has shown a marked improvement over that of former weeks, and the thrashing outfits have been busy all over the district. Within the Rural Municipality of Bow Valley it is stated that there are at present thirty-two outfits at work, and in the adjoining Municipality of Keoma there are also a large number employed.

Until the grain is threshed out it will be difficult to estimate the average yield, but although the crop this year will not be in any sense a bumper one, yet with high prices prevailing it should give net returns at least as good as last year.

Farmers in the immediate vicinity of town who have threshed out lately, and of whose returns we have heard include F. M. Dewitt, whose wheat averaged 20 bushels and oats 30 bushels; F. Le Harrison, whose wheat also averaged 20 bushels; and Lester Dodd, rearing C. C. Nard's farm, and who suffered in the recent fire, whose wheat averaged 24 bushels. The Strathmore Farm Co.'s summerfallow land is averaging 20 bushels or thereabouts of wheat per acre. The acreage of wheat in crop on the farm is about 300.

Probably one of the best crops threshed to date is that of Herb Ruppel, who had 300 acres of summerfallow which yielded him an average of 28 bushels per acre.

IRRIGATION RESULTS

Irrigation has been used a lot more extensively this year than in any former year, and in every case reported it has been beneficial to the crops.

The forty-acre plot on which Mr. Walters, the Dominion Government investigator, has raised a varied assortment of crops, is going to reap some surprising returns, but it is not threshed yet. The grain from every large and half-acre plot is stacked, and the size of the stacks seems very large for the area of land on which they were grown.

Mr. R. S. Stockton, superintendent of irrigation, informed us that results were already beginning to come in, and that some very good yields were recorded. For instance: L. H. Lyverston, of Craighair, irrigated his crops in 1912 and 1913 and this year he sowed his oats on stubble and irrigated them. The strip along the ditch averaged him 97 bushels per acre.

At the Elwood irrigation district, had forty acres planted to barley. Ten acres were irrigated and 30 were not. The ten acres irrigated yielded 400 bushels, while the thirty not-irrigated only yielded 270 bushels.

J. B. Johnansen, of Craighair district, irrigated his land in 1911, 1912, and 1913. Last year he irrigated his summerfallow. His wheat below the ditch averaged him 40 bushels per acre, while that above the ditch only yielded 10 bushels per acre. In wheat he was about 100. 45 acres of irrigated barley gave a return of 120 bushels, or 442 bushels per acre.

R. B. Robson, the watermaster at Crowfoot, had a field of 8 1/2 acres of oats which yielded an average of 95 bushels per acre. The rest of the acre above the ditch in the same field gave a return of 49 bushels per acre. This was the first crop raised on this land, which was broken last summer. The oats were seeded April 22, irrigated May 23 to 27, cut on August 11, and threshed September 11.

Report supplied by Mr. C. A. Nickerson.

Yes, there's sufficient difference in styles for the new season to make a visit to this store interesting.

Local Taken Off

NEW WINTER TRAIN SCHEDULE

It is announced in Calgary that the new train schedule, which will take effect on Sunday first, provides for only two passenger trains each way per day over the main line.

The local between Hsmanu and Calgary will be discontinued as also will Nos 13 and 14.

Nos 1 and 4, the afternoon train, will handle the local between Calgary and Medicine Hat.

Yes, they do give a 75c meal for 35c, put up by a first class white chef at the Maple Leaf Hotel.

Subscribe to the Standard. You will get the best possible value for your money.

During the last week The Strathmore Patriotic Fund have received a number of requests for food, and the committee has been busy preparing and distributing various quantities of food to be sent into hospitals, barracks, and sailors.

There is still a large amount of work ready for distribution and material may be obtained at Mr. Lambert's Drug Store, Mr. Allan's and Mrs. Lewis'. If you are already a worker why not interest your friend or neighbor.

Give your business to the advertisers in the Strathmore Standard. The merchant who publishes the figure he is selling his goods at deserves your support. Shop where you are invited to shop.

MODERN JERUSALEM
WEALTHY JEW'S DREAM

Nathan Straus, Jew of Berlin
and Sanitary Conditions of
the Holy Land.

To recreate the Holy Land

immense project to be undertaken

Nathan Straus, one of the greatest

of New York, and his wife, Mrs.

Straus, with his two sons, Nathan

and H. Grant Straus, retired from

the firm of H. H. Macy & Co., Inc.,

New York, to devote all their energies

to bringing Palestine into the

20th century of twentieth century pro-

gress. Nathan, Jr., will go to the an-

cient towns of the Jewish people to

take up there one part of his father's

unfulfilled philanthropic plan to try

installing modern sanitation systems

there largely to prevent diseases

among the people. Father and son

are both ardent Zionists.

A great suite of offices has been

equipped in New York for the carry-

ing on of the commercial end of this

great project and hundreds of letters

and applications for aid are received

weekly. The elder Straus will divide

his time between the New York office

and the Holy Land.

In his plans for rehabilitating

Palestine Straus includes the estab-

lishment of complete sewage systems,

a local water supply, the most

modern health and sanitary houses,

modern electric and gas kitchens as

well as clinics for the treatment of

various scourges.

The urgent need of such work is

shown by an article in a leading

medical journal, which says: "Jerusa-

lem is a city in which one out of

every five of its 70,000 inhabitants

carries the parasite of malaria in its

blood and three-fifths of the popula-

tion give evidence of enlargement

of the spleen. These facts, so strik-

ing because of the enormous amount

of preventable disease and so pathetic

because they mean so large a loss

of human usefulness, are not hearse

figures. They are facts.

To the least of present-day knowl-

edge the pictures of the primitive

sanitary arrangements that still ob-

tain in ancient Jerusalem would be

They were taken before Justice's last
year and Victory, when the war was
on and costs for food and clothing
were high. The Jews of the Holy Land
were not so different, and with the
help of the International Committee of
the Red Cross, they were able to
bring the relief to the Holy Land.

One of the things that the teacher to the
apology to the Holy Land.

the research making the addi-

tion, was that the attendance

is increasing to such an extent that

three teachers are unable adequately

to handle the various grades, and

that some of the pupils have passed

Grade 8, and wish to continue

their education in Strathmore.

The number of pupils on the regis-

ter two weeks ago was 111, and

it is expected that by the beginning

of next month the number will have

risen to at least 120.

For some time past Strathmore

parents have been sending their

children to outside centres to re-

ceive a secondary education, but

this will be no longer necessary, as

Mr. Jones, the principal, holds a Uni-

versity B.A. degree, and is fully

qualified to conduct the work in the

higher stages.

The cost of an additional teacher

will be in the neighborhood of

\$100 per year, which will be offset

by the grant of \$250 from the De-

partment of Education for the ex-

tra room, and by a grant of \$80 for

providing higher education, and

several smaller grants from the

present financial conditions.

A somewhat serious scene took

place a few days ago when the

chairman regarding the appoint-

ment of a committee to conduct the

fining up, etc., of the new room,

War Maps Free

To follow intelligently the Euro-
pean War situation and keep in
touch with the fighting movements
of the troops, a comprehensive war
map of Europe giving all details is
essential.

Of all the maps issued there is
but one that fills the bill, and that
is the one issued specially by the
publishers of "The Family Herald
& Weekly Star," of London, Eng.,
G. W. Bacon & Co., London, Eng.

The Standard has concluded
arrangements with "The Family
Herald and Weekly Star" by which
our readers may also secure the
map free of charge. In this issue
will be found a clipping of the
two papers, including the Map.
The offer is one that every
reader of the Standard should accept.

Read over announcement and
order at once.

Tudor Notes

The Embroidery Club met at
the house of Mrs. R. S. Frayne last
Thursday. Among those present
were Mrs. Adon Rogers, Mrs. Brown,
Mrs. Kehoe, Mrs. Hero, Mrs. H. W.
Leonard, and Miss Inez Horn.
Refreshments were served and a
very enjoyable afternoon was spent.
The ladies of the club have in con-
templation a huge bazaar for the
merit, hence there is keen in-
terest in the organization on the
part of the members.

A mass meeting of the rate-
payers of the Tudor School Dis-
trict was held Saturday night to
consider ways and means of estab-
lishing the school early this fall.

Threshold has been delayed
practically a full week on account
of rain. While not good for the
work it will assist greatly the yield
of the crops for next year.

The yield of grain has been dis-
appointing so far. The straw in-
dicated a heavier yield than what
turned out on the summerfall.
The stubble crops will not generally
pay to thresh.

The new Alberta Pacific Elevator is
open for business and is receiving
some grain, but not much has been
paid to move yet.

Mr. Andy Kanhman and Wm
-er were visitors at Tudor

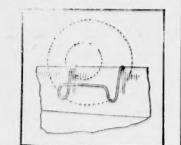

NATHAN STRAUS

such an interesting subject. As
might be expected, malaria-bearing
mosquitoes were supreme. Their
chief breeding places are the cisterns
which provide the water supply from
the rain on the mountains.

Straus' philanthropic in Palestine
have not in the past been restricted
to persons of his own religious faith,
and have not been conducted in any
form of religious or racial intolerance.
His concern has been, and will be,
with the welfare of the people, and
the suffering through proper pro-
gressive and scientific measures.

In Palestine the Jews, Christians
and Mohammedan population alike
have shared and will continue to share
in the benefits of his work.

The Kitchen Wash Basin

If there is a wash basin in your
kitchen the chances are you are com-
pelled to look for it every time you
want to use it. That is the way it
usually is. Why not fix things so that
the basin is kept in the same place,
and that place right alongside the
stove? Get a length of heavy wire
- a wire will do-and bend
- in the drive.

WOULD YOU PICK UP A NICKEL?

5c Why of course you would, and here are lots 5c
of nickels for you at

THE STRATHMORE TRADING CO., LIMITED

The Dance which was to be held
at Rockfield Friday was postponed
on account of stormy weather.

Drugs are plentiful. Where any
irrigation is going on in the district
take to the flowing ditches and are
easily beggled.

Microbes in Your Scalp
Authorities say that a microbe
can be found in the scalp of every
man, woman and child. It is called
the "scalp microbe" and is the cause
of many of the scalp diseases. It is
found in the scalp of every man, woman
and child. It is called the "scalp microbe"
and is the cause of many of the scalp
diseases. It is found in the scalp of every
man, woman and child. It is called the
